Living by Water Project

Working towards healthier human and wildlife habitat along the shorelines of Alberta

About LbyW

Living by Water has completed over 500 homesite consultations on 21 Albertan lakes. It is a unique educational program that teaches waterfront residents about environmentally friendly practices that will help maintain shoreline and water health.

We encourage residents to reorganize the role that shorelines play in the enjoyment of their day to day lives, and provide simple, personalized tips on how residents can make small changes that go a long way in protecting the aquatic environment and their investment!

Living by Water is a core program of
Nature Alberta

Wizard Lake Watershed
Lake Stewardship Association

The Homesite Consultation Program

In conjunction with your local conservation officer Living by Water is pleased to bring the Homesite Consultation Program to your community! This is an opportunity to work one-on-one with trained Shoreline Advisors regarding your property, and learn tips and tricks to help make your property more lake-friendly. The Shoreline Advisor will focus on your concerns and interests, as well as touching on key areas such as erosion, development, wildlife-human conflict, invasive plants and nutrient loading. We stress the importance of remedying existing concerns as well as proactive change! **Please contact Kate Daniel (780 985-3287) or Dana Stromberg (780 427-8124; lbw@naturealberta.ca) to book your consultation!**

We are visiting your lake community this summer!

When?

July 12th – 13th
Advisors are available to work with 8 residents at Wizard Lake!

Where?

Your property!
We work with you on your property so that the suggestions are personal.

What?

Free consultation!
The Homesite Consultation is **free** of cost and **confidential**.
